

E135 Duck Starter Crumb (CP 21%)

A protein and energy rich diet designed to get birds off to a healthy start and establish rapid growth.

Feed from 1 to 21 days.

E136 Duck Grower Pellet (CP 17%)

A blend of energy and protein with an ideal balance of amino acids to ensure continued growth, early feathering and maturity.

Feed from 3 weeks onward.

E127 Duck Breeder Pellet (CP 16%)

Blend of proteins with specific amino acids. Formulated with fish oils and cereals for optimum egg production and healthy ducklings.

The J & A Bashford & Sons Game Feed Range incorporates aniseed as a flavour. This facilitates transition from one feed to the next and also helps retain straying birds.

The J & A Bashford & Sons Game Feed Range also includes emericox; essential oils to combat specific species of coccidia to aid the bird to develop immunity to coccidiosis.

“...at the end of the day it's what's in the bag that counts”

J & A Bashford & Sons Ltd would like to introduce you to their Game Feed Range. J & A Bashford & Sons have over 30 years experience in the animal feed business and a lifelong passion for game shooting. Manufactured in conjunction with a 4th generation poultry feed milling company, this Game Feed Range has been formulated with extensive input from both the nutritional expert and the game producer. This is key to the performance of the birds and the presentation of the feedstuffs.

The diets are designed to get birds off to a healthy start, achieving excellent growth and feathering. Birds consistently become the high flyers both the gamekeeper and the game shooter like to see.

- Feeds are manufactured and EFSIS approved under the UFAS Feed Assurance Scheme.
- Made to the most advanced nutritional specifications; tried and trusted for consistency in performance and health.

Omega 3 fatty acids supplied by fish oils and essential amino acids for optimum protein levels and balance.

Precision in game feed mineral, vitamin, trace element supplementation.

Specific inclusions of digestive enhancers and hydrating agents to enhance the wellbeing of birds

- Medicated feed available on veterinary prescription.
- Expert nutritional and veterinary service available.

E131 Game Starter Crumb (CP 27.5%)

A high density diet. Containing a combination of more than six different sources of proteins and fish oils. Formulated to produce healthy birds with **vigour, appetite and growth**. *A ration designed to resemble, as close as possible, the diet nature would provide.*

Feed from 1 to 14 days.

E132 Game Rearer Pellet (CP 24%)

A 2mm pellet containing a combination of energy, protein and fish oils formulated to ensure rapid growth and excellent feathering.

Feed from 14 to 28 days.

E133 Game Grower Pellet (CP 22%)

Manufactured in a 3mm pellet, this diet will ensure target growth rate is maintained when used after Game Rearer Pellet. It is also ideal for feeding bought in poults.

Feed from 4 to 12 weeks.

E134 Game Grower 2 Pellet (CP 20%)

Game grower 2 is based on the E133 game grower formula. It is manufactured in a 3mm pellet, but with a pellet hardener and a water repellent included. This improves the durability of the pellet when spun out in feed rides.

Feed from 7 to 12 weeks.

E128 Game Maintenance Pellet (CP 15%)

Specifically designed to maintain bird health and condition. Contains aniseed flavouring to help prevent straying birds. Can be mixed with wheat grains.

Feed from 12 weeks onward.

E137 Game Breeder Pellet (CP 18%)

This high quality complete breeder diet includes fish oils. E137 provides all the essential nourishment and nutrients for maximum egg production, hatchability, and viable poults.

Feed from 4 weeks pre-lay and throughout lay.
